

TEMPERATURE  
CONTROLLED

services by

Temperature Controlled services are provided through three strategically located distribution centres in Grimsby, Wolverhampton and Tewkesbury. With no fewer than 14 temperature-controlled stores and a state of the art, web-enabled information system, we can provide the optimum multi-temperature logistics solution for any business. From storage and delivery of frozen or chilled raw materials for production, right through to the final distribution of product to end customers, ACS&T can deliver a professional service.

## Why choose ACS&T?

Our track record of providing efficient consolidation services to the foodservice industry is unrivalled in the UK. We deliver real competitive advantages due to:

- Total logistics solutions from all sites to meet your needs from production line to end user
- Consolidated shared-used deliveries, including those to the leading foodservice outlets
- Our status as an approved supplier to major delivery wholesalers, which enables you to take advantage of our economic logistics service in order to deliver case quantities throughout the UK

Operating to the highest codes of practice, we are certified to the rigorous quality and hygiene standards BRC, ISO 9001 and ISO 14001.

## Temperature Controlled

We also provide a full range of transport services to ensure a cost effective route to market for your business:

- National delivery on a shared-user or dedicated basis
- Factory clearance on a backhaul or shuttle system
- Cross-docking services to limit storage costs
- Just in time (JIT) deliveries of frozen or chilled raw materials for production
- Reverse logistics system to manage return stocks from your customer

Last but not least we provide a comprehensive range of additional services, to ensure that we can meet all your logistics needs:

- Efficient and rapid case picking and pallet consolidation
- Bar code scanning and RDTs
- Bonded storage
- Blast and rapid air freezing
- Handballing (de-stuffing) and product sorting
- Repacking and case labelling
- Pallet inversion
- Product recovery – tempering
